DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18, 20, 21, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by pan et al. (5,616,052).

In regard to claim 18, Pan et al. discloses a receiving element 32 for a plug connection device, comprising: openings 36 with a substantially uniform inner surface formed for contacting a contact pin 58, the inner surface having receiving element grooves (see attached drawing) extending in a radial direction, wherein a distance between adjacent receiving element grooves is smaller than a distance between adjacent openings 34, 36 and the receiving element 32 is made from a non-conductive material.

In regard to claim 20, Pan et al. discloses the receiving element grooves extend transversely to a mating direction of a contact pin 58.

In regard to claim 21, Pan et al. discloses machining marks are removed in an area of the receiving element grooves.

In regard to claim 23, Pan et al. discloses that the receiving element grooves are inclined with respect to a longitudinal direction of the opening 36.

In regard to claim 24, Pan et al. discloses that the receiving element grooves are inclined by about 45 degrees.

Allowable Subject Matter

3. Claims 1-12 and 14-17 are allowed.
4. Claims 22 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: In regard to claim 22, the prior art fails to provide, teach or suggest the receiving element grooves extend further in a radial direction than in a longitudinal direction. In regard to claim 25, the prior art fails to provide, teach or suggest the receiving element grooves have a teardrop Shape.

Response to Arguments

5. Applicant's arguments with respect to claims 18 and 20-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
